

**Doc 3.0 CORE VALUES**

The core values are those values which form the foundation on which people perform work and conduct themselves. These are values so primary and important that throughout the changes in school environment they are still the core values the members will abide by. In an ever-changing world, fundamental values are constant. Core values are not descriptions of the work or strategies but the values which underlie work, how members interact and go about their work, and which strategies fulfill mission.

Note: This is required for student organization applying for accreditation.
